MEMORANDUM FOR: Deputy Director (Support)

SUBJECT: Location of Emergency Power Plant

[REDACTED]

25X1A6A

1. This memorandum suggests action on the part of the DD/S. Such requested action is contained in Paragraph 4.

2. [REDACTED] previously requested that the emergency power plant be located near the motor pool, rather than near the administration building as approved by headquarters. This request was turned down due to an additional cost of \$10,000.

25X1A6A

3. From an engineering viewpoint either location is suitable. The Chief, FE Support Base, has been very anxious for approval of the site he selected near the motor pool.

4. In view of [REDACTED] (IN 40971) it is requested that the attached cable authorizing relocation be recommended for release by the Acting DCI. The approval of the DCI is necessary due to the fact that funds originally approved for this project by PRC action are not sufficient to make this change.
